

Project Design Phase-II

Data Flow Diagram & User Stories

Date	31 January 2025
Team ID	SWTID-2026-7028
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
System Admin / Configurer	UI Policy Setup	USN-1	Open the UI Policy Actions Go to the High Impact Control UI Policy created earlier. Scroll down to the UI Policy Actions related list to define field behaviors.	UI Policy Actions related list is accessible on the High Impact Control UI Policy form.	High	Sprint-1
System Admin / Configurer	UI Policy Setup	USN-2	Create a New Action Click New to create a UI Policy Action to configure how individual fields behave when the UI Policy is triggered.	New UI Policy Action form opens successfully.	High	Sprint-1
System Admin / Configurer	UI Policy Action Field Config	USN-3	Fill in the Action Details: - Field name: Urgency (Select	1. Urgency field selected 2. Read-only set to true 3. Visible field	High	Sprint-1

			Urgency on Incident form) - Read-only: true (Field becomes read-only when Impact = High) - Visible: Leave unchanged (Field remains visible)	remains unchanged		
System Admin / Configurer	UI Policy Action Save	USN-4	Submit the Action Click Submit to save the UI Policy Action and link it to the High Impact Control UI Policy.	Action is saved and automatically applies to Urgency when Incident Impact is High.	High	Sprint-1
QA / Tester	Verification & Testing	USN-5	Optional Verification: 1. Open an Incident record. 2. Set Impact field to High. 3. Check that Urgency becomes read-only. 4. Change Impact to confirm field reverts back.	Urgency field dynamically becomes read-only when Impact = High and reverts when Impact changes.	Medium	Sprint-1
