

Project Design Phase
Problem – Solution Fit Template

Date	15 February 2025
Team ID	SWTID-2026-7028
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit for this project is to automatically set the Urgency field to High when the Impact field of a ServiceNow Incident is changed to High. The Client Script runs on the Incident table and uses an onChange trigger for the Impact field.

Purpose:

- ☐ Problem: When an Incident has High Impact, the Urgency should be updated appropriately.
- ☐ Solution: Create an active onChange Client Script on the Incident table for the Impact field.
- ☐ Action: When the new Impact value is '1', the script sets the Urgency value to '1'.
- ☐ Feedback: The script displays the message 'Urgency set to High for High impact incident.'
- ☐ Verification: Open an Incident, change Impact to High, and verify that Urgency updates automatically.

Client Script Name: Auto set urgency for high impact

Table: Incident

Type: onChange

Field name: Impact

Active: true

Condition: When newValue == '1' (High Impact)

Result: g_form.setValue('urgency', '1')

Verification: Change Impact to High and check that Urgency updates automatically.

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? I.e. working parents of 0-5 y.o. kids	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? I.e. spending power, budget, no cash, network connection, available devices.	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? I.e. pen and paper is an alternative to digital notetaking	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one, explore different sides.	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? I.e. customers have to do it because of the change in regulations.	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? I.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (I.e. Greenpeace)	
Identify strong TR & EM	3. TRIGGERS TR What triggers customers to act? I.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7	Extract online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? I.e. lost, insecure → confident, in control - use it in your communication strategy & design.		8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.
